I've got just a little bit of a note here. That I love you to death line at the end is a surprisingly accurate translation (given the usual circumstances surrounding Japanese sayings) however there is one slight difference in the term in Japanese. She literally says something like I love you enough to die, but the meaning comes through either way, and the english saying conveys the message just as well and sounds more natural, so that's what I went with.

In other news, just to make sure everyone understands, this is a weekly manga that will contain various short stories related to this whole undead phenomenon. So far only chapters 1 and 2 have been published, but I can assure you that some of Inoue's standard stupid humor comes through in chapter 2, so maybe he hasn't alienated his original fans after all. We shall see.
